

# **IOWA RETAILER RENEWABLE FUELS TAX CREDITS**

(Effective May 21, 2014)

# **Ethanol Promotion Tax Credit**

This revised credit applies to the current Iowa Renewable Fuels Standard (RFS). Retailers may qualify for the following based on combined sales of biodiesel and ethanol:

- Any retailer meeting the renewable fuels schedule for a given year would be entitled to an 8 cent tax credit on every gallon of ethanol (E100) sold.
- For retailers within 2 percent of meeting the RFS schedule, the tax credit equals <u>6 cents</u> on every gallon of ethanol (E100) sold.
- For retailers within 4 percent of the RFS schedule, the tax credit equals:
  - 4 cents in calendar years 2012 through 2017

Note: The retailer has the option of computing their Iowa Renewable Fuels
Standard threshold on a company-wide or site-by-site basis.

# Renewable Fuels Standard Schedule (E10, E15, E85, and Biodiesel)\*

2011	12%
2012	13%
2013	14%
2014	15%
2015	17%
2016	19%
2017	21%
2018	23%

(continued)

<sup>\* (</sup>E100 + B100) ÷ G100

## **E85 Promotion Tax Credit**

A retailer may claim a tax credit on the total gallons of E85 fuel sold in a given tax year. The tax credit rate is:

2012-2017: 16 cents per gallon

## **E15 Tax Credit**

Retailers may claim a tax credit for blends containing a minimum of 15% ethanol (E15) and a maximum of 69% ethanol (E69) 2014-2017:

3 cents per gallon from September 16 – May 31 of each calendar year 10 cents per gallon from June 1 – September 15 of each calendar year

# **Multiple Credit Eligibility**

A retailer may claim the ethanol promotion tax credit on all ethanol (E100) content, even if the blended fuel also qualifies for the E15 or E85 promotion tax credits. For example: assume a retailer has the following sales for 2012:

<u>Type</u>	<u>Sales</u>	Ethanol Content	E100 Gallons	
E10	335,000 gallons	x 10%	33,500 gallons	
E15	340,000 gallons	x 15%	51,000 gallons	
E85	75,000 gallons	x 79% (ave.)	59,250, gallons	
	750,000 gallons		143,750 E100 gallons	

The retailer's Iowa RFS would be: 143,750 divided by 750,000 = 19.2%. Therefore the retailer would qualify for the highest ethanol promotion tax credit rate (8 cents per gallon of E100). Their total tax credits would be as follows: Qualifying Gals. Rate Tax Credit Amt.

		<b>Total Tax Credit:</b>	\$40,641
E85	75,000	16 cents	<u>\$12,000</u>
E15 (June 1-Sept. 15)	99,165	10 cents	\$9,916
E15 (Sept.16-May 31)	240,835	3 cents	\$7,225
Ethanol Promo (E100)	143,750	8 cents	\$11,500
dits would be as follows:	Qualifying Gals.	<u>Rate</u>	lax Credit Amt.

#### **Retailer Misfueling Liability**

Iowa law now states that a retailer is **NOT LIABLE** for damage caused by the use of incompatible motor fuel dispensed at the retailer's site, if:

- The incompatible motor fuel complies with fuel specifications under Iowa Code.
- The incompatible motor fuel is chosen by a customer.
- The dispenser is correctly labeled.

#### **Biodiesel Tax Credit**

The previous eligibility threshold requiring that biodiesel represents at least 50% of total fuel sales in order to claim a biodiesel tax credit <u>has been eliminated</u>. The tax credit schedule for biodiesel blended fuel gallons is now as follows:

<u>2013-2017:</u> 4.5 cents per gallons for B5 or higher biodiesel blends
